## ABOUT AUSTRALIAN WILDLIFE JOURNEYS

Australian Wildlife Journeys (AWJ) is a group of Australia's leading independently owned wildlife tourism experiences, showcasing small-group wildlife encounters within wild habitats, combined with world-class hospitality. A high level of guiding expertise and focus on interpretation that connects with guests, encourages self-reflection and aligns with local community values underpins the group.

The member-driven alliance was established as a not-for-profit organisation in September 2016, with members representing a wide array of Australia's different ecosystems (both aquatic and terrestrial) and wildlife categories. Each member of the collection demonstrates a standard of interpretative guiding and hospitality considered as the benchmark in each region.

Australian Wildlife Journeys is part of Tourism Australia's Signature Experiences of Australia program, which packages and promotes Australia's outstanding tourism experiences within a variety of niche areas and special interest categories.

In partnership with Tourism Australia and State Tourism Boards, the brand is strongly guided by increasing the awareness of the country's diverse and compelling 'wildlife in the wild' portfolio, providing assets that make it easier for consumers and distribution partners to plan and bundle wildlife journeys and mentoring the wider wildlife tourism sector to enhance the country's overall positioning.

All members of Australian Wildlife Journeys are united by the mission to bridge the gap between the conservation and tourism sectors and provide a platform for a greater volume of travellers to experience Australia's wildlife in the wild, to help conserve and regenerate these precious habitats.

With destinations around the world, including our great country, being threatened by climate change impacts, extreme weather, water scarcity, and unprecedented rates of biodiversity loss, we believe that responsible tourism addresses these challenges head on, by protecting our amazing destination at the same time as giving travellers the opportunity to actively contribute to the conservation of local ecosystems on our tours.

On behalf of the membership, I would like to thank you for your support of the Australian Wildlife Journeys concept and we look forward to partnering with you to achieve this important mission.

# PURPOSE & USAGE OF THIS DOCUMENT

The purpose of this document is to create a central hub for distributors to reference in relation to our AWJ member experiences.

Since AWJ's inception, there has been a significant amount of product development take place across various niche areas aligned with wildlife travel, including photography, birdwatching and 'behind the scenes' conservation activities. Whilst a number of our members are familiar to Australian distributors, many of the experiences offered as part of the Australian Wildlife Journeys portfolio are yet to be loaded into distributor platforms.

The collation of this document provides a consistent approach to listing booking terms & conditions, tour logistics, rates and policies for shared and private tours, to simplify and expedite the process of loading new programs.

## **Contracted Nett Rates & Booking Terms**

Please note that this document only includes gross rates.

*Please note: Australian Wildlife Journeys is not responsible for negotiating the rate of commission or booking terms between individual members and distributors. We would kindly ask you to confirm commission arrangements at the stage of loading the tour(s) via the contact details listed in the booking terms & conditions section for each member.*

## **Validity of Rates and Frequency of Updates**

Australian Wildlife Journeys will publish a new edition of the tariff manual at least once a year, flagging new tours and member additions.

## **POA scenarios or Missing Tour Details**

The tariff manual is designed to reflect all experiences listed on the Australian Wildlife Journeys website.

There may be the odd case, where a tour is not listed as yet or a private tour is a price on application scenario. Our objective is to limit both these situations in future editions, to ensure as many indicative rates are available to distributors as possible.

A staggering 30,000 west coast Humpback Whales migrate through the Exmouth and Ningaloo region and start to rest after their long migration from the Antarctic. The Department of Parks & Wildlife has recently given authority for Exmouth Dive & Whalesharks Ningaloo to provide guided swims with these amazing creatures under strict parameters and conditions. Visitors will venture out in small groups of seven with a guide & videographer to record one of the most special intimate encounters of the ocean. # TOUR NAME: OUTER REEF OR ISLAND DIVE & SNORKEL TOUR

## Booking Code:

Alternative Tour Names (if applicable):

## TOUR BLURB

This adventure offers the opportunity to see the beauty of the Muiron Islands or outer reaches of the Ningaloo Reef, depending on the prevailing weather conditions and areas showcasing optimal visibility. Surrounded by an abundance of coral gardens, rocky ledges and intriguing dive sites, the Muiron Islands are located about 10nm north east of Exmouth. Keep your eyes open during the 60 minute trip across to the Islands for ospreys, shearwaters, turtles, manta rays, dolphins, dugongs, and during their migration, humpback whales.

We have a wide range of dive sites with a maximum depth of 20m and usually only gentle currents, the dive sites around the Muiron Islands are suitable for all levels of snorkelers (over Six years of age) and divers. Swim-throughs and ledges provide plenty of places to search for shrimps, nudibranchs, eels, juvenile angelfish and other timid creatures. In mid-water and against the reefs look for friendly potato cod, large rankin cod, turtles, nurse sharks, soft coral gardens, anemones, clams and 1000's of darting, colourful reef fish. Late in the year, manta rays grace several of our dive sites, too.

The snorkeling sites around the Ningaloo outer reef area are just as magical with opportune sightings of Mantas, turtles or whichever marine life we find. We get to snorkel with gorgeous colourful fish, corals, with opportune sightings of Dugongs, Turtles & much more! Then we venture out to look for mantas from the deck of one of our big stable boats. Get ready for an added bonus of Humpback Whale Watching in Whale season. Equipment, and full lunch drinks and snacks are provided along with our professional in-water guides for extra safety.

## TOUR BLURB

Relive your favourite experiences by capturing the wonder and adventure of the aquatic realm with digital underwater photography. It's hard to imagine activities more versatile than underwater imaging. Whether snorkelling, exploring reefs, under ice or on wrecks, if there's something worth seeing, there's something worth photographing. This makes underwater photography a pursuit that mixes well with your other diving activities, and one that permits you to share the underwater world with non-divers. And with the emergence of digital cameras, underwater photography lies within most people's reach and ability.

Our location is ideal for teaching underwater photography and allows much opportunity for photographing a varied number of marine creatures in calm water. We have a professional underwater photographer on staff.

Our Digital Underwater Photography Specialty course will introduce you to the exclusive SEA Method (Shoot, Examine and Adjust) of digital underwater photography and is available for both divers and snorkellers. You'll learn the fundamentals of underwater photography, from choosing a camera that suits your needs, helpful camera techniques, choosing your subjects wisely and learning to use software to maximise the quality of your photographs.

# TOUR NAME: BEHIND THE SCENES WITH RESEARCHERS – QUOLLS

**Booking Code: FNQ\_research**

*Alternative Tour Names (if applicable): Quoll Citizen Science Tour*

## TOUR BLURB

This program offers you an exclusive opportunity to work alongside industry experts and assist in conducting valuable research that will aid in the preservation of Far North Queensland's endangered wildlife. The rainforests of the Tablelands provide habitat for a rich array of marsupials, reptiles, invertebrates and over 320 birds, but one of the iconic species of the region is the Spotted-tailed Quoll.

You will join the researchers and other team members as they check camera traps and motion detection areas to catalogue sightings, document food sources, locations and behaviours and search for evidence of visits from the Spotted-tailed Quolls. We kindly ask that our guests keep all research locations confidential. This will protect the success of our future research. This behind the scenes tour provides a unique opportunity to enter research locations not accessible to the public to observe the endangered Spotted-tailed Quoll. Alberto Vale and Justin McMahon are our expert research guides and they have been carefully studying these fascinating and mysterious creatures for several years. Join them in the rainforest and take part in their research projects.

This tour is not for profit with ALL proceeds going directly to The Australian Quoll Conservancy (AQC). The AQC are a not for profit organisation, now in their sixth year of operation. Several Species Recovery Units are now established in Victoria and North Queensland. AQC emphasises the need for the recovery of these species in those areas, with unique, innovative and non-invasive monitoring methods that transcend current Animal Ethics, scientific methodologies and requirements.

Solid walking shoes with good soles are OK however trainers/runners are generally not recommended.

Guests walk along firm beaches and formed bush tracks and a moderate level of fitness is required. We provide a day pack for you to use over the 3 days. You will carry a water bottle, lunch and your waterproof jacket in the pack.
